

*The Jan Kochanowski University
in Kielce
Department of Environment Protection
and Modelling
Kielce Scientific Society*

have an honour to invite you to participate in
1st International Scientific Conference

Bioindication as challenge in modern environmental protection

which will take place on **10-13 September 2013** in Kielce/Sobków.

According to the subsidiary legislation of Ministry of Science and Higher Education since 1st October 2011 the protection of environment has been placed on the list of scientific disciplines. It was a very important decision both for scientific workers dealing with environmental protection and for scientific units, which has environmental protection in their names.

Each scientific discipline should have a range of study, as well as defined methodology and methods of investigations. Environmental protection currently meets the challenge, as up to now it has used methods of investigation accepted in many other scientific disciplines.

The aim of the 1st International Scientific Conference entitled **Bioindication as challenge in modern environmental protection** is to make a review of accomplishments and possibilities of use of living organisms to control ecological status.

The modern evaluation of environmental status should act in the way which allows us to interpret environmental changes through investigation of living organisms functioning in the environment. We hope that this conference will be the beginning of annual meetings devoted to bioindication.

We would also like to dedicate this conference to the 40th anniversary of scientific work of Professor Bogusław Wilkomirski – Honorary Doctor of National University of Uzbekistan in Tashkent.

During the plenary session the general papers will be presented and during few thematic sessions papers and posters reported to the conference will be also presented.

The accepted abstracts will be Publisher in conference materials.

The presented works will be published after positive peer-reviews in the journals:

„Natural Environment Monitoring” and "Yearbook of the Holy Cross Mountain Region"
(journal possessing points on the list of Ministry of Science and Higher Education)

Conference Fee*: - 800 PLN including VAT (The fee covers breakfasts, lunches and dinners, scientific excursion and transportation from Kielce to Sobków and back, as well as conference materials)

The Conference Fee does not cover transportation to Kielce and accommodation in hotel in Sobków**
